Program Design: Person to Person Model developed by Dr. Mary Jo Bulbrook is used in each training that combines an empowerment equal partnership relationship to support decision making for learning, growing and healing. Being together in an equal playground helps facilitate a shared decision model that places the emphasis on partnerships rather than hierarchy model of deciding from someone else. The individual can make wise choices rather than having to just do what someone suggests or requires. Service is individualized to meet student, client needs, desire and goals.

CEU's and Costs: Each program has continuing education units and appropriate contact hours required to meet the objectives, content and outcomes. Click on the item to be reviewed.
