

Doctor of Philosophy (Ph.D.) in Management

by executive open-learning and dissertation research

DOCTOR OF PHILOSOPHY IN MANAGEMENT

Advanced study at Akamai University provides an effective path to the Ph.D. in Management for working executives, nonprofit managers, and professional businessmen and businesswomen. Akamai has assembled the essentials of business knowledge and consolidated them within this tremendously vital series of program elements. In addition to basic principles, Akamai presents business specializations in a wide array of major concentrations, permitting participants to personalize their overall program of study.

AIMS & OBJECTIVES

Business leaders can no longer afford to continue doing business without the critical skills necessary for success. To address this challenge, Akamai teaches the fundamentals of business, emphasizing practical skills important to the "real world" of corporate and business administration in a manner that is applicable to the regional and business challenges of the participant. In an increasingly competitive global environment, organizations need to develop managers capable of dealing with complexity and change. Akamai delivers the dynamic frameworks that enable NGO, business and corporate leaders to quickly adapt to changing conditions and seize new opportunities as they emerge.

ENTRY REQUIREMENTS

Akamai offers access to its Ph.D. in Management for eligible professionals from the fields of business and corporate management, international business, government and nonprofit management, e-commerce, entrepreneurship and small business operations, and economic development. For acceptance to the doctoral program, participants should have completed a recognized Master's degree or equivalent in business or another appropriate field and have several years of meaningful professional experience at upper levels of management.

In lieu of the Master's degree, applicants are considered with a recognized Postgraduate Diploma, professional awards, and a minimum of five years of increasingly more responsible business experience. Such applicants are required to submit appropriate letters of recommendation verifying the prerequisite capabilities and motivation to succeed in advanced study and research. Applicants accepted in the absence of the Master's degree are required to add

essential missing academic and research elements to the minimum program, for admission.

Successful applicants are proficient in English language or provide assurance of effective language support. As an entry requirement, participants must demonstrate access to a computer, email, and Internet, and academic business library resources for the duration of their studies.

DEGREE REQUIREMENTS

For the PhD in Management, participants must complete a minimum of 60 credits above the Master's degree including the comprehensive review, and dissertation project activities. Further, the participant must complete that module that reflects the degree concentration and must complete a dissertation with an approved focus in that concentration.

- Balakrishnan Muniapan, Leadership Expert - MSc (HRM), B.Econs, CIPM, PhD(Candidate)

PROCESS OF PROGRAM COMPLETION

Step #1: Assignment of Faculty Review Committee

After the PhD student's admission and registration, as the first step in the program, Akamai University in collaboration with EDS Business School will assign the PhD student's Faculty Review Committee. Once the primary member of the Committee has been assigned, the PhD student shall begin the preliminary activities of the degree program. The secondary members of the Committee are assigned later during progress through the program.

Step #2: Study Plan Process

The first activity of the doctor of business administration program is the completion of the PhD Study Plan document, which guides the PhD student and review committee through the degree process. The PhD Study Plan clarifies the degree designation and specialization that will be pursued through the program. The PhD Study Plan itemized the subject modules and other activities to be completed as expectations for the degree, and includes a timeline of completion of each of activity.

Step #3: PhD Major and Core Competencies

PhD students complete 27 graduate credits in preparing a foundation in theories, principles and practices in advanced contemporary business administration aimed at arming the participants with the basic management orientation necessary to undertake successful research in business administration. The PhD major and core courses stage of study will cover in three residential studies in Penang, Malaysia. Each residential studies covering 9 graduate credits which comprises 3 modules.

Step #4: Research Preparation

PhD students complete 15 graduate credits in research competency modules. The research preparation modules comprise research tutorials as a preparation for successful dissertation research. Participants produce scholarly papers that focus upon the background and problem statement for their dissertation, clarification of the research questions, overview of the literature review, methodology for conduct of research, and clarification of research preparation and manuscript guidelines. These tutorials are grades by the Committee Chair on a pass–fail basis.

Step #5: Comprehensive Review

Upon completion of the core subject and research preparation modules, PhD students are authorized to undertake the Comprehensive Review via Transformational Portfolio project. As the primary assignment, PhD students prepare an effective Summary of the findings from the research preparation modules with clear reflection upon the theme of their dissertation. The Review Committee shall present instructions and questions to the PhD student for primary focus in completion of the written assignment. Upon review of the student's written submission, the Review Committee shall conduct either a face-to-face review or an telephone communication and exchange of email dialogue, exploring the student responses in detail and guiding the student in perfecting the written response.

Step #6: Dissertation Proposal

PhD candidates submit the dissertation research proposal under the direction of the Doctoral Review Committee and according to publish University guidelines. After making the required changes and additions, the proposal is approved.

Step #7: Dissertation Project

PhD candidates shall complete the Dissertation Project guided by the published guidelines of the University and their approved Dissertation Proposal. Upon completion of the research, the candidates prepare a draft of the research manuscript. Referencing of the scholarly literature throughout the dissertation manuscript is a vital element of the manuscript, without which it shall not receive University approval.

Step #8: Review of Dissertation

The Review Committee is provided a draft version of the dissertation manuscript for physical review. The Committee prepares a listing of concerns and questions to be explored with the PhD candidate during the oral review of dissertation. PhD candidates are expected to be able to explore the dissertation in detail. A written version of the Committee's questions and concerns, as well as a brief set of notes from the oral review should be prepared by faculty and provided to the University for the permanent archival record.

Step #9: Finishing Activities

Following the review of dissertation, the Chair of the Review Committee shall provide the DBA candidate with instructions for completing final corrections and modifications to the dissertation manuscript. Following approval of the final manuscript, the PhD candidate is authorized to arrange for binding the manuscript, and the document is submitted to the EDS headquarters. The Chair of the Doctoral Review Committee completes the Degree Record form and submits this document to the University together with requested quality control materials. Upon receipt of all mandated materials and documents, the student is “graduated” and the finishing documents are issued (letter of completion, transcript of record, and diploma certificate).
